HabasitLINK®

Solutions for the Poultry Industry

Oblong Hole

Conventional Design

HabasitLINK®

Improved Design

Habasit's patented design improves access to the rod and hinge area during sanitation

Applications

- Live Birds
- Deboning
- Chiller Inclines
- Re-circulation Tables
- Packing
- Freezing
- Metal & Bone Detectors

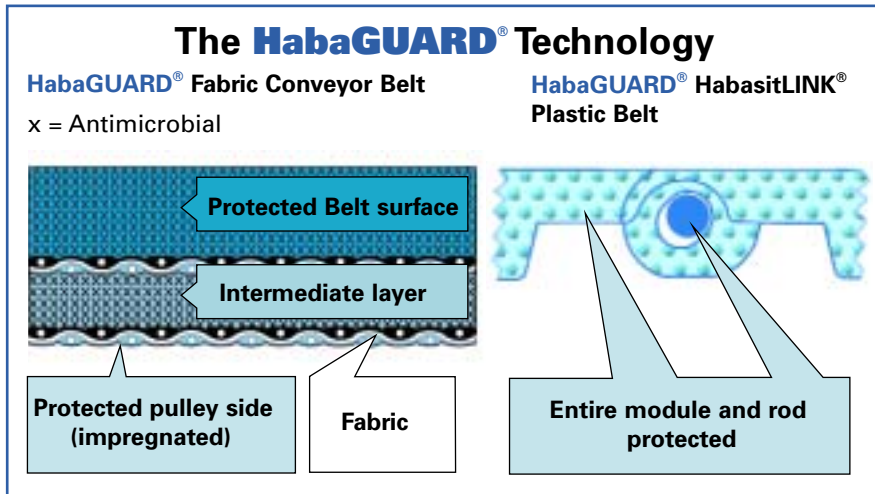

Why HabasitLINK® plastic modular belts?

HabasitLINK® plastic modular belts are sprocket-driven for positive drive and tracking which virtually eliminates problems associated with mistracking that can lead to belt damage. Flights are assembled as an integral part of the belt and can be replaced with a minimum of downtime without complicated tools or equipment. The all-plastic design provides maximum chemical and abrasion resistance, while eliminating concerns of metal contamination.

HabasitLINK® modular belts innovative technology offers the only design specifically engineered for use in the food industry. Habasit's unique patented oblong hole allows improved access during sanitation to the hinge area, and to the rod across the entire width of the belt. Combined with **HabaGUARD®**, an exclusive anti-microbial agent, Habasit belts provide the highest level of food safety and cleanability in the marketplace today.

Have You Done All You Can?

If you are concerned that your belts might be carrying more than just your product –The Solution is Habasit

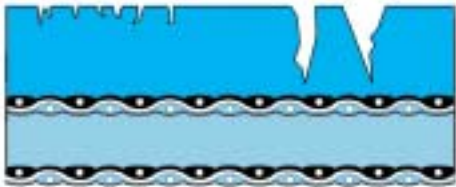

HabaGUARD® conveyor belting contains an antimicrobial additive that prevents growth of spoilage microorganisms on belt surfaces. The antimicrobial in **HabaGUARD®** prevents mold proliferation, the related odors, discoloration and degradation of belt surfaces.

The antimicrobial in **HabaGUARD®** is the only additive approved and EPA-registered for direct food contact. **HabaGUARD®** belts provide the highest level of food safety, belt protection and cleanability in the marketplace today.

The effectiveness of the **HabaGUARD®** antimicrobial additive will continue throughout the operating life of the belt.

Benefits of the “protected” belt surface

Mini cuts, micro cracks, scuffing or even notches & large cuts caused by external influences are fully protected against spoilage microorganisms

This product does not protect users or others against food borne or disease causing bacteria. Adhering to proper cleaning procedures is always essential.

Application Guide

Belt Style #		Live Birds	Deboning	Re-Hang Tables	Chiller (Inclines)	Elevators	General Conveyance	Tote/Tray Conveyors	Packing	Freezing
Series 1200 0.5" Belts										
M1220	Flat Top					PE	PE			
M1233	Flush Grid						PE			
Series 2500 1" Belts										
M2510	Flat Top			PE			PE		PE	
M2511	Perforated Flat Top									
M2520	Flat Top					PE	PE	PP	PE	
M2533	Flush Grid									PE/AC
M2500	Friction Top								PP	
M2531	Raised Rib									
M2540	Radius Flush Grid						PE/AC	PP/AC	PE/AC	
Series 3800 1.5" Belts										
M3840	Radius Flush Grid							PP/AC	PE/AC	PE
Series 5000 2" Belts										
M5010	Flat Top	PE/PP	PE	PE	PE	PE	PE			PE/AC
M5011	Perforated Flat Top				PE/AC	PE				
M5013	Cone Top				PE/AC	PE				
M5014	Nub Top					PE	PE			
M5020	Flat Top	PE						PP	PE/PP	
M5020	Grip Top							PP	PP	
M5031	Raised Rib									
M5032	Flush Grid Heavy Duty								PE/PP	
M5033	Flush Grid				PE

Conveying Quality - Habasit is the only company that offers both Domestic and European fabric belts as well as plastic modular belts. We manufacture from virgin raw materials to ensure products that meet our standards. We offer many different training opportunities to enhance or maintain the level of belting knowledge at your company.

Conveying Service - Habasit has expert Distributor partners throughout the US who are committed to providing the best service, local inventories, belt installation capabilities, 24 Hour delivery service, and strong application and troubleshooting knowledge. Chances are that one of our partners is your neighbor. If you prefer to install your own belts, Habasit can supply you with splicing equipment that we manufacture specifically for preparing and splicing our belts on-site, and the necessary training to help your people become fabrication ready.

Conveying Solutions - Contact one of our Product Managers, Market Managers, Engineers, District Managers or Authorized Distributors for the optimal solution for your application. The breadth of our product line allows us to recommend the right belt for each application.
